

THE TRANSACTION IS JUST THE BEGINNING™

Spree Commerce provides one of the fastest-growing and most-used technology platforms in the world. More than 45,000 retailers worldwide use Spree for their storefront today. But if you're a successful online merchant, you know that e-commerce involves much more than a storefront.

As your business grows, you add suppliers, shippers, and other vendors -- all across the globe. You talk to more customers, collect more data, and sell more things out of more places. It gets very complex. That complexity can kill a growing business. Don't let that happen to you.

Wombat automates your backend logistics so that you can run your business more efficiently. Wombat works with all leading storefronts, including those of Spree, Magento, Shopify, Hybris, and any custom solution. Wombat insulates your storefront from the complexities of your backend operations so that you can focus on what you do best -- serving your customers and growing your business.

HOW WOMBAT WORKS

An order is placed at the store.

Wombat detects the new order and starts the fulfillment process

Wombat manages the complex backend for you so that you can focus on selling

THE BENEFITS OF USING WOMBAT

- Don't spend your scarce resources building a custom solution - we've built the framework for you
- Focus on what you love, your business will grow and run better
- Get to market quickly - Get your store up and running quickly, with streamlined operations
- Lower your ongoing maintenance costs and spend your time being more productive
- Discover and resolve errors with orders before your customers are even aware of them
- Avoid losing orders, and potentially losing customers
